The Caress of Laniph is a direct damage spell with a range of 12" that targets a single enemy model (even a character in a unit). If successfully cast, the target suffers a number of hits equal to 2D6 minus his own Strength. Hits from the Caress of Laniph cause a wound on a roll of 4+, with no armour saves allowed. The Wizard can choose to extend the range of this spell to 24". If he does so, the casting value is increased to 12+.

Remains in play. The Purple Sun is a magical vortex that uses the small round template. Once the template is placed, the player then nominates the direction in which the Purple Sun will move.

To determine how many inches the template moves, roll an artillery dice and multiply the result by 3. Any model touched by the template must pass an Initiative test or be slain outright with no saves of any kind allowed. If the result on the artillery dice is a misfire, centre the template on the caster and roll a scatter dice and a D6. The template moves the number of inches equal to the result of the D6, in the direction shown on the scatter dice (if you roll a Hit!, use the little arrow shown on the Hit! symbol). In either event, in subsequent turns, the Purple Sun travels in a random direction and moves a number of inches equal to the roll on an artillery dice. If a misfire is rolled in subsequent turns, the Purple Sun collapses in upon itself and is removed. A particularly brave Wizard can infuse the Purple Sun of Xereus with more power, so that it uses the large round template instead. If he does so,
