Remains in play. Sakhmet's Incantation of the Skullstorm uses the small/large round template. Once the template is placed, the player nominates the direction in which the Skullstorm will move. To determine how many inches the template moves, roll an artillery dice and multiply the result by the caster's Wizard level. If the result on the artillery dice is a misfire, centre the template on the caster instead; the template moves a number of inches equal to the caster's Wizard level, in a random direction (if you roll a hit, the template remains where it is). Any model under, or passed over by, the template suffers a single S 5 hit. In subsequent turns, the Skullstorm travels in a random direction and moves a number of inches equal to the roll of an artillery dice (if a misfire is rolled, the Skullstorm dissipates and is removed).
