Remove a model from the front rank of the unit and place it anywhere within 3D6" of its original position, facing in any direction. Remove the remainder of the unit from the battlefield and form them up around the first model so that the unit keeps its original formation and the first model maintains its original position in the unit (if the unit comprised just one model, such as a chariot or character, then this step is unnecessary). Models from the unit cannot be placed in impassable terrain, nor may they be placed within 1" of any other unit. The Shaman can choose to extend the distance that the target unit moves to 3D6". If he does so, the casting value is increased to 14+.

Place the Foot of Cork template within 36" of the Shaman. It then scatters D6", maintaining the same facing. All models hit by the template suffer a Strength 6 hit with the Multiple Wounds (D3) special rule. The Foot of Cork template can be found on page 111.

The Shaman can choose to intensify Cork's involvement in the battle to a full warpath of stomping. If he does so the casting value is increased to 18+, but after resolving the effects of the spell, roll a dice and consult the following table:

1 Cork slips and stomps one of your own units! Your opponent places the template anywhere on the table. It then scatters and inflicts damage exactly as described above. The spell then ends.  
2-3 Cork gets bored and wanders off. The spell ends without further effect.  
4-6 Cork stomps another enemy unit. Place the template again, as described above. After resolving the effects of this stomp, roll again on this table.
